Christian and Jochen Metz in Blumberg

We are continuing the story, with a focus on making the best connections!

Dear customers,
dear business partners,

For over four decades, the family company METZ CONNECT has stood for precision, reliability, and a spirit of innovation. These are virtues that we live out every day at all of our production and distribution sites worldwide.

As pioneers in communication between man and machine, we always share our experience and our knowledge across generations, always continuing to grow.

The METZ CONNECT product range is divided into three core areas, and offers a broad array of solutions for even the most challenging demands:

- P | Cabling** Copper, fiber optic and WLAN components for structured network cabling.
- U | Contact** Circuit board connection technology for connecting devices and controllers in building and industrial automation.
- C | Logline** Intelligent system and switch cabinet components for building and process automation.

You probably encounter METZ CONNECT products multiple times a day without seeing them: from circuit board components to connection terminals in control elements, to copper and fiber optic components for network cabling or intelligent I/O components in switch cabinets for building automation. Many areas of everyday life, including complex industrial delivery and production chains, require intelligent networking for devices and components. METZ CONNECT offers full service, from the circuit board to the internet, for all of these applications.

As a partner to countless international companies, we offer competence borne from over 40 years of experience in standardized and above all customer-specific system solutions for diverse applications in connection technology. We see ourselves as problem solvers, and are never satisfied with a second-best solution. Searching for the best might seem tricky, but it always pays off.

Work with us on device and system construction projects and on structured building and industrial cabling. We look forward to hearing from you!

Sincerely,

Jochen Metz

Managing partner

Christian Metz

Managing partner

and the entire METZ CONNECT team.

METZ CONNECT

YOUR partner for company-wide networking

Around the world, products from METZ CONNECT guarantee safe and reliable connections for frictionless information flow – from the circuit board to the infrastructure environment. Highly specialized, internationally standardized and high-performance network solutions in WLAN, copper and fiber optic technology impress with simple installation, maximum quality and highest systems capability across all relevant performance classes.

Our competencies

At METZ CONNECT, we focus on quality and we are dedicated to maintaining our production sites in Germany. In addition to highly qualified technicians, our secret to success is our high degree of vertical integration, which ranges from our in-house punching shop to operating equipment and tool manufacturing, special machinery construction and an in-house laboratory.

HOUSINGS

Industry

The world of office and industrial cabling is becoming less differentiated over time. Increasingly, Ethernet is being used in industrial automation. In addition to bus solutions which are still in use, however, Ethernet offers the option of managing communication. Being able to access each individual point in the network makes adjustments and changes easier, promising short downtimes

and gains in productivity. The industrial environment places increased mechanical demands on products, such as abrasion, deflection, vibrations and drag chain operation, as well as IP protection. METZ CONNECT offers M12 connection lines, round connectors and switch cabinet feed-throughs, RJ45 Industrial Ethernet patch cords and IP protected housings for this application.

Home cabling

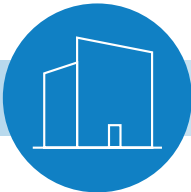

New developments in communication and information technology mean that we have more and more media and communication devices in our homes. From smart home applications to IP-TV with HDTV, streaming, downloading huge quantities of data from the internet, uploading data to the cloud, or working from a home office, such applications demand ever higher data rates. Application-neutral data network technology is essential to ensure a continuous, smooth transfer of data.

DATA NETWORK
TECHNOLOGY

FIBER IN
THE HOME

Data centers

METZ CONNECT offers the DCCS product series specially for the needs of data centers: a compact, pre-assembled product solution in the Cat.6_A performance class. With the 25G system, fiber optic technology with OM5 or OS2 fibers, as well as multi-fiber technology (MPO), you can already integrate the future into your network infrastructure today.

SOLUTIONS

Distributed building services

Today, many PoE applications are no longer always connected to outlets in the wall, the raceway, table solutions, or floor. Increasingly, these connections are being placed in the ceiling, such as in WAPs, near doors, on presentation walls for digital signage, for instance, as well as outside of buildings on exterior walls or lantern posts. One alternative to horizontal cabling is zone ca-

bling in suspended ceilings. In this case, the horizontal cabling runs from a floor distributor to a certain area in the building. The Service Concentration Point is located in this area, from which the cabling runs to a service outlet or directly to the devices. This makes the cabling more flexible and easier and less expensive to change in case of a move, or in case devices are added or removed.

The portfolio of RJ, USB, M12, Coax and Fiber optic connectors for cabling systems offers a wide range of connectors and jacks in different power and protection classes for copper and fiber optic connections.

MC Modul or Keystone?

Our modules are available with different installation cut-outs (MC Modul and Keystone).

In different applications (such as wall outlets, patch panels, module frames, DIN rail housing REGplus, underfloor units, etc.), it is essential that the installation cut-out for the application is compatible with the installation cut-out for the module. Therefore, when choosing a module, it is important to consider its individual installation cut-out. The product specification provides all of the information you need to do so.

Installation cut-out – MC Modul design

Installation type

C6Amodul 180°

E-DAT modul 180°

Installation cut-out – Keystone design

Installation type

C6Amodul K 180°

E-DAT modul K

MC Modul installation cut-out – benefits at a glance

BENEFITS

- > the shape and associated installation type allow the module to be installed and removed securely and easily in applications (such as wall outlets, patch panels, ...)
- > applications can be manufactured from a wide range of different materials (plastic, stainless steel ...)
- > the pre-tensioned bracket made of highly conductive material runs through the entire module without any material changes
- > a consistently stable shielded connection is ensured for years, with minimal contact resistance from the connected installation cable to the inserted RJ45 patch cord
- > patch panels based on the MC Modul installation cut-out also ensure consistently low contact resistances, from the cable shielding to the module frame

MC Modul

Plugs and jacks for network cabling

RJ45

C6_Amodul

- > fully-shielded RJ45 modul for field assembly Cat.6_A up to 10 GBit
- > connect without special tools, short mounting and connection time
- > easy installation and connection of data lines AWG 26/1 to 22/1 (single-wire) and AWG 26/7 to 22/7 (multi-wire) to IDC type terminal blocks
- > intelligent cable management in the charger, also suitable for highly twisted wires
- > migration to 25G systems without special tools
- > robust, single-piece, reusable module housing made of die-cast zinc, finished
- > suitable for 10 GBit/s Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus, UPoE and 4PPoE), HDBaseT, SAT-IP and AV over IP
- > GHMT Cat.6_A re-embedded PVP certified
- > optional, colored dust protection covers on page 46

- > connect without special tools, short mounting and connection time
- > cable termination stranded wire AWG 26/7 to 22/7, core diameter 0.43 to 0.76 mm
- > cable termination full core AWG 26/1 to 22/1, core diameter 0.409 to 0.64 mm
- > core diameter up to 1.6 mm
- > suitable for cable sheath diameters from 5.5 to 8.5 mm
- > 2-piece zinc die-cast housing suitable for industrial applications
- > suitable for 10 GBit/s Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus, UPoE and 4PPoE), HDBaseT, SAT-IP and AV over IP
- > can be used as a test plug in the IP67 side in variants 1, 4, 5, 6 and 14
- > without locking lever
- > suitable plug housings starting on page 167

P/N	ASSIGNMENT	PACKAGING UNIT	CAN BE SEPARATED
1401400810-I	T568A, T568B, Profinet	10	yes

E-DAT Industry RJ45 field plug insert Cat.5 Class D PROFINET

- > 4-Wire Cat.5 plug Profinet for field assembly for installation in IP67 plug housings in variants 1, 4, 5, and 14
- > connect without special tools, short mounting and connection time
- > cable termination stranded wire AWG 26/7 to 22/7, core diameter 0.43 to 0.76 mm
- > cable termination full core AWG 26/1 to 22/1, core diameter 0.409 to 0.64 mm
- > core diameter up to 1.6 mm
- > suitable for cable sheath diameters from 5.5 to 8.5 mm
- > 2-piece zinc die-cast housing suitable for industrial applications
- > suitable for 100 MBit/s Ethernet (IEEE 802.3bw), Remote Powering (PoE, PoE plus and UPoE)
- > can be used as a test plug in the IP67 side in variants 1, 4, 5, 6 and 14
- > without locking lever
- > suitable plug housings starting on page 167

P/N	ASSIGNMENT	PACKAGING UNIT	CAN BE SEPARATED
1401400810PI	Profinet	10	yes

E-DAT Industry RJ45 plug black Cat.6 Class E_A

- > multiport-capable Cat.6 Class E_A plug
- > suitable for connection of AWG 27/7 to 24/7 and AWG 26/1 to 24/1
- > full core copper conductor diameter 0.36 to 0.51 mm
- > strand copper conductor diameter 0.46 to 0.61 mm
- > core diameter from 0.85 to 1.05 mm
- > cable sheath connectable up to 7.3 mm
- > crimp contacts and shielding can be connected in a single work step with a crimp tool
- > fantail as protection against bending the connection cable
- > suitable for 10 GBit Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus and UPoE)
- > can be used as a test plug on IP67 protected jacks in variants 1, 4, 5, 6 and 14
- > optional, colored strain relief bushings on page 47

P/N	ASSIGNMENT	PACKAGING UNIT	CAN BE SEPARATED

Fiber optic

OpDAT FAST™ Hybrid LC buffer

- > field assembly fiber optic connector for single mode applications
- > with hybrid technology: Index matching gel plus Opto-Elast guarantee very good and constant optical values
- > no polishing, no gluing when installing on site
- > simple, fast and cost-effective mounting in under two minutes
- > available with straight (UPC) or angled polishing (APC)
- > connector kits for fiber optic buffers with Ø 0.25 and Ø 0.9 mm
- > traceable using serial numbers
- > variants contain the following tool:
 - fiber guide for easily inserting the fiber into the connector

The decision between fiber optic or copper data cables as the ideal solution for the workplace depends on multiple factors: the environment where they will be used, the network basis, and the planning horizon. No matter which you choose, with fiber optic or copper data cables from METZ CONNECT, optimally tailored to the requirements of all structural levels of local networks, you will be on the safe side for the future.

Our high-quality cables are always used where high-speed data transmission in local area networks (LAN) is required. The cables are used for structured and application neutral networks – Ethernet 100BaseT, 1000BaseT and 10 GBit Ethernet. In addition to voice and data communication, our solutions are suitable for delivering a remote feed to different devices via Power over Ethernet (4PPoE to 100 W) as well as HighEnd 4K Video e.g. HDBaseT.

Our product range includes installation and connection cables that have been tested for compatibility using commonly available connection components. This ensures we can deliver maximum operational reliability.

- > cable design: S/FTP
- > suitable for: VoIP, IoT, M2M, Industry 4.0, multimedia, broadband video (HDMI-, 4K HDR over Ethernet)

Transmission-related properties

- > Category (ISO): 6_A
- > Class (ISO/IEC): E_A
- > remote Powering: PoE, PoE plus, UPoE
- > transmission speed: up to 10 GBit IEEE 802.3an

Materials and material properties

- > wire cross section: AWG 27/7
- > cable sheath diameter: 6 mm
- > halogen-free: yes
- > strain relief bushing: extruded
- > bending radius: 30 mm
- > cable sheath material: LSHF (LSOH)

Ambient conditions

- > temperature operation: -20 °C to +60 °C

Certifications/approvals

- > DUXR.E178484, DUXR.E178484, UL 444
- > CE

RoHS: conforming

Cable configurator: yes

- > standard lengths (m): 1, 2, 3, 5, 10, 20

Order number code

XX = length

03 = 0.3 m	50 = 5.0 m	A9 = 19.0 m
05 = 0.5 m	70 = 7.0 m	B0 = 20.0 m
10 = 1.0 m	95 = 9.5 m	B5 = 25.0 m
20 = 2.0 m	A0 = 10.0 m	C9 = 39.0 m
30 = 3.0 m	A5 = 15.0 m	

Y = bushing color

0 = black	6 = red
3 = gray	7 = yellow

Industry patch cord RJ45

General data

- > industrial RJ45 patch cord
- > cable design: S/FTP
- > suitable for: Industrial Ethernet, harsh environments, IoT, M2M, Industry 4.0

Transmission-related properties

- > Category (ISO): 6_A
- > Class (ISO/IEC): E_A
- > remote Powering: PoE, PoE plus, UPoE
- > transmission speed: up to 10 GBit IEEE 802.3an

Materials and material properties

- > wire cross section: AWG 26/7
- > cable sheath diameter: 6.4 mm
- > halogen-free: yes
- > strain relief bushing: extruded
- > bending radius: 24.4 mm
- > cable sheath material: PUR LSHF

Ambient conditions

- > resistant to: oil
- > temperature operation: -40 °C to +70 °C

Certifications/approvals

- > CE
- > RoHS: conforming

Cable configurator: no

- > standard lengths (m): 1, 3, 5, 10

142M2X55010 = 1 m	142M2X55050 = 5 m
142M2X55030 = 3 m	142M2X55100 = 10 m

Further cable lengths available upon request.

Cables and wires

Patch cords RJ45

RJ45 industrial cable

Properties

- > data transmission rates of up to 10 GBit/s according to ISO/IEC 11801
- > 360° full shielding
- > PUR cables are oil resistant and suitable for industrial areas
- > IP20 to IP67 solutions
- > IP67 variants are delivered with connector protection
- > delivered as cable ring or packaged in a poly bag (depending on the length)

Application

- > wiring in industrial areas
- > for use in harsh environments

The world of office and industrial cabling are becoming less differentiated over time.

While, in the past, Ethernet was the standard for data and voice transmission only in office buildings, Ethernet is being used more and more today for industrial applications as well. Ethernet/IP are simple and functional because they are able to combine real-time performance with the load capacity and safety of commonly available bus solutions.

However, networks do face interfering factors that can have a significant influence on transmission quality. The risk of faults due to vibrations, dirt and moisture is very high, especially at connection points.

METZ CONNECT offers a diverse selection of high-quality industrial cables with IP protected connectors. Thanks to IP67 protection, these copper data cables ensure reliable, care-free function in applications such as switch cabinets, floor distributors, machine distributors and Ethernet devices.

RJ45 Consolidation Point-Direct Attached cable

RJ45 Consolidation Point-Direct Attached cables are high-quality assembled copper data cables, assembled on both sides with RJ45 plugs that are manufactured manually and individually to the highest standards.

Thanks to a wide range of options for combining many different types of copper cables and RJ45 plugs, they are suitable for many different applications.

Assembled copper data cables facilitate a quick, easy to install point to point connection for passive and active network components. Utilize the advantages of the assembled parts to complete retrofits during ongoing operation, saving money compared to on-site installation.

Properties

- > different types of copper cables for 10 GBit / 25 GBit applications
- > assembled with RJ45 plugs
- > delivered as cable ring or packaged in a poly bag (depending on the length)
- > suitable for Remote Powering
- > 100 % testing

Application

- > cabling in primary, secondary and tertiary areas of buildings
- > data center cabling

Patch cords RJ45

RJ45 trunk cable

Structured building cabling

In office environments today, most network connections are placed near work stations in raceways and in-floor outlets. In addition to technological devices with network connections, the increasing integration of shared building services like IP cameras or smart home applications is changing the horizontal network infrastructure.

These applications are no longer always connected to wall outlets or to outlets in a raceway or the floor. Increasingly, these connections are being moved to the ceiling, creating a network infrastructure with new cabling solutions.

Our RJ45 trunk cables are the right choice to create a quick and simple cabling solution allowing you to start up a CP / SCP with up to 12 braided Ethernet cables, without having to complete any on-site assembly.

Properties

- > different types of copper cables for 10 GBit / 25 GBit applications
- > braided from up to 12 cables, optionally with graduated fanout
- > robust cable braid – assembled with RJ45 plugs
- > supplied as a cable ring
- > suitable for Remote Powering
- > 100 % testing

Application

- > building backbone (building floor cabling)
- > data center cabling
- > cabling in tertiary areas (digital ceiling)
- > office cabling

Pre-assembled fiber optic installation cables

Overview

Configurator – Pre-assembled fiber optic installation cables

Pre-assembled installation cables (VIK) are fiber optic cables equipped on one or both sides with connectors which are individually manufactured by hand under the highest quality requirements at METZ CONNECT in Blumberg. In combination with universal cables, mini breakout cables (MBO), breakout cables (BO), outdoor cables or mini breakout cable compact (MBO C), they are suitable for mechanically challenging applications indoors or outdoors. VIKs are frequently used in combination with OpDAT patch panels. They allow for quick, easy to install point-to-point connections of passive and active network components. This significantly reduces installation time and costs compared to installation with splices and pigtails or cabling with individual patch cords.

All available variants are shown in our configurator www.metz-connect.com/configurator-pre-assembled-installation-cables

- VIK with universal cable
- VIK with outdoor cable
- VIK with breakout cable
- VIK with mini breakout cable
- VIK with mini breakout cable compact

M12 extension/connection cables

The M12 extension/connection cable product family is divided into M12 Industrial Ethernet, D- and X-coded, as well as M12 sensor/actuator, A-coded.

M12 Industrial Ethernet extension/connection cables, D- and X-coded

Shielded M12 Industrial Ethernet extension/connection cables for secure, industrial-level data transmission in automation and fieldbus technology. Various cable types for increased mechanical loads, such as abrasion, bending, vibration, drag chain operation and torsion, in various performance Classes Cat.5 (100 MBit/s), Cat.6_A (10 GBit/s) with D- and X-coded connectors.

Power types

- > AWG 22/19 PUR 5_e
- > AWG 22/7 PUR 5_e
- > AWG 24/7 PUR 6_A
- > AWG 26/19 PUR 5_e
- > AWG 26/19 PUR 6_A
- > AWG 26/7 PUR 6_A

Interfaces

- > M12 jack
- > M12 connector
- > M12 connector angled
- > RJ45 plugs
- > free cable end

M12 sensor/actuator extension/connection cables, A-coded

M12 sensor/actuator extension/connection cables with injection molded M12 A-coded connectors fulfill the typical requirements of the automation industry. The sensor connectors are available in various designs and with different numbers of poles. The diverse range of sensor connectors also includes 360° shielded and unshielded variants. All extension and connection cables are available in PUR and PVC cable qualities.

Power types

- > PUR shielded/unshielded
4, 5, 8 buffers
- > PVC shielded/unshielded
4, 5, 8 buffers

Interfaces

- > M12 jack
- > M12 jack angled
- > M12 connector
- > M12 connector angled
- > free cable end

You can create your cable quickly and easily online using the configurator. All part numbers and technical information is provided here.

Notes

Cable connectors

1 Cable connectors82

Occasionally, cables “come up short” during maintenance or system expansions, or when installing new network cabling. Replacing the entire length of the cable, however, results in extra work and added costs.

In some cases, on-site circumstances may make such an exchange impossible. Class E_A and Class F_A cable connectors from METZ CONNECT are the smart solution for extending or connecting data cables easily and without special tools. Thanks to the range of available variants, they can be used in different applications and even when only limited space is available. Because they fulfill Class E_A or Class F_A links with up to 10 Gbit/s can easily be retained.

This makes the cable connector a true problem solver for almost any network infrastructure, and a basic tool that belongs in every tool box.

Cable connectors

Class E_A

Cable connectors Class E_A

- > highly compact Class E_A cable connector suitable for field assembly, for 8-wire cables (optionally also for 4-wire cables)
- > for the connection, cable extension, repair and re-routing of copper data cables up to Cat. 8
- > robust, single-piece, reusable module housing made of die-cast zinc, finished
- > simple assembly – mounting without special tools, strain relief via snap-on clip directly on the charger
- > in conjunction with Cat. 6_A or higher copper cables, Class E_A is fulfilled up to 500 MHz according to ISO/IEC 11801, DIN EN 50173
- > suitable for 10 GBit Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus, UPoE and 4PPoE), HDBaseT, SAT-IP and AV over IP

P/N	SHIELDING	CABLE FEEDING
130863-04-E	yes	180°
130863-05-E	yes	270°/90°
130863-06-E	yes	360°

LSA

LSA cable connector

- > for connecting and extending data cables up to Cat. 8
- > in conjunction with Cat. 6_A to Cat. 8 cables and Cat. 6_A connection technology, Class E_A is fulfilled according to ISO/IEC 11801
- > suitable for 10 GBit Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus, UPoE and 4PPoE), HDBaseT, SAT-IP and AV over IP
- > connection of data cables AWG26/1 to 22/1 (single wire) to LSA connection terminals
- > cable feeding possible from one or two sides
- > cable sharing, dividing an 8-wire to two four-wire cables possible (one cable connector required on the input and one on the output side)
- > fully shielded metal housing with 2 drill holes for wall mounting (IP20 version)
- > strain relief and separate 360° shielded connection, captive
- > IP67 protection with specialized heat-shrink tube (130863-01-E)

P/N	WALL MOUNTING	IP PROTECTION
130863-E	possible	IP20
130863-01-E	not possible	IP67

Class F_A

Class F_A cable connectors

- > Class F_A cable connector suitable for field assembly, for 8-wire cables
- > for the connection, cable extension, repair and re-routing of copper data cables up to Cat. 8
- > finished die-cast zinc housing suitable for industrial applications
- > simple assembly – without special tools
- > shielded connection and strain relief
- > easy connection of data lines AWG 26/1 to 22/1 (single wire) and AWG 26/7 to 22/7 (multi-wire) to IDC type terminal blocks
- > in conjunction with Cat. 7_A copper cables, Class F_A is fulfilled according to ISO/IEC 11801 up to 1.000 MHz*
- > suitable for 10 GBit Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus and UPoE), as well as SAT-IP and AV over IP
- > IP67 protected housing in conjunction with IP67 suitable wires *

* see data sheet

P/N	DIAMETER	LENGTH	CABLE FEEDING
130863-02-E	16.8 mm	64 mm	180°

Application examples

Moving infrastructure

such as a work station or network distributor cabinet

Cable extension

e.g., cable too short

Repair

e.g. defective cable

Wall outlets

1	RJ45	84
2	Fiber optic	86
3	Empty housings	90
4	Underfloor	93
5	IP protected wall outlets	96
6	Accessories	98

METZ CONNECT offers wall outlet solutions that guarantee the highest possible flexibility for structured cabling. Our product range includes both modular and compact wall outlets, underfloor units, as well as connections for DIN rails.

Wall outlets

RJ45

Wall outlet C₆modul 180°

- > modular wall outlet for designing a passive network infrastructure to meet the highest quality standards
- > suitable for connecting telephones up to 10 GBit networks and for power supply with PoE with up to 90 W
- > very robust, nickel-plated, die-cast zinc module, consisting of just two parts
- > continuous quality controlling during production and independent testing laboratories with a wide range of certificates confirm the very high quality of the individual modules
- > connect without special tools, short mounting and connection time
- > easy installation and connection of data lines AWG 26/1 to 22/1 (single-wire) and AWG 26/7 to 22/7 (multi-wire) to IDC type terminal blocks
- > intelligent cable management in the charger, also suitable for highly twisted wires
- > migration to 25G systems without special tools
- > color of plastic parts pure white, RAL 9010
- > suitable for 10 GBit/s Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus, UPoE and 4PPoE), HDBaseT, SAT-IP and AV over IP
- > GHMT Cat.6_A re-embedded PVP certified
- > labeling sheet & dust protection covers on page 99

OpDAT VADT plug-in

- > pre-assembled fiber optic wall outlet
- > for surface mounting on flush or cavity wall outlets.
Integrated latches on the rear additionally enable horizontal or vertical mounting on DIN rail systems
- > outlet ready to install with indoor cable and equipped with LC-Duplex adapters for outside connection of up to four fiber optic patch cords.
Second side of the cable pre-assembled at the factory with fiber optic connectors, connector type freely selectable bubble wrap or a pulling aid with IP50 are available to protect this connector
- > cable type:
 - SM: mini breakout cable compact, white, diam. 4.5 mm
 - MM: mini breakout cable, diam. 5.2 mm
- > cable wound on cardboard reel for easy assembly
- > fixing material included in delivery
- > outlet color pure white (similar to RAL 9010)
- > cable lengths: 2 to 100 m
(replace XX in the part number with the length, e.g. 05=5 m, A0=100 m)
- > all available variants can be created using the VADT configurator

OpDAT REG K VIK

- > very compact patch distributor for TH35 DIN rail for up to 16 fiber optics connectors
- > prepared for installation of pre-assembled installation cables (OpDAT VIK)
- > fitted with fiber optic adapters
- > different installation variants possible on DIN rail
- > cable feeding from top or bottom
- > M20 cable infeed included in the delivery contents

P/N	ADAPTER TYPE	ADAPTER COLOR
15024K07A04-E	4 x LC-Q APC	green
15024K07904-E	4 x LC-Q	heather violet
15024K07804-E	4 x LC-Q	aqua

15024K0D104-E	4 x ST-D	metallic

OpDAT REG K connect

- > very compact housing for TH35 DIN rail for up to 12 fiber optic connectors
- > prepared for connection of two installation cables
- > splice storage with crimp splice holders
- > different installation variants possible on DIN rail
- > cable feeding from top and bottom
- > 2 M20 cable infeeds with strain relief are included in the delivery contents

P/N	SPLICE HOLDER
15024K0B200-E	incl. crimp splice holder

OpDAT REGpro modular housing

- > splice distributor for TH35 DIN rail without front plate
- > with or without splice tray with crimp splice holder (CSH) for up to 12 splices
- > with fiber reservoir
- > labeling strips for custom labeling
- > mounting set on the DIN rail via a highly robust DIN rail bracket
- > different installation variants possible on DIN rail
- > for different front plates 3 RU / 7 HP
- > cable feeding from top or bottom, straight or angled, with M20 screw fitting (up to 2 possible)
- > pre-assembled cables can be inserted
- > one M20 cable infeed with strain relief is included in the delivery contents
- > housing cover mounted using just one screw

P/N	HOUSING TYPE	SPLICE HOLDER
15024A10-E	REGpro, unequipped	without splice tray
15024A10-24-E	REGpro24, unequipped	without splice tray
15024A10S-E	REGpro	with splice tray, CSH

DIN rail housings

Fiber optic OpDAT REG

OpDAT REG S

- > very compact splice distributor for TH5 DIN rail
- > flat design with one angled outlet (connections on top) and one large cabling chamber
- > excellent operating convenience even with high cabling ducts nearby
- > for installing pigtails or pre-assembled installation cables (VIK)
- > modular design: housing, equipped front plate and splice storage must be ordered separately
- > visible area with labeling strips
- > cable feeding from top or bottom with M20 strain relief (optionally available)
- > with splice storage for crimp or shrink splices available
- > highly stable DIN rail bracket
- > cover secured by captive screw
- > suitable for mixed equipping with glass fiber and copper technology

P/N	SPLICE HOLDER
15024B10-E	for pre-assembled wires
15024B10S-E	incl. crimp splice holder
15024B10S-S	incl. shrink splice holder

OpDAT REGpro modular LC-D FP

- > front plate 3 RU / 7 HP with LC-D adapters
- > ceramic guide sleeve, slotted for single mode and multi-mode applications
- > suitable for installation in OpDAT REGpro and OpDAT REG S
- > powder-coated steel sheet, light gray RAL 7035

DIN rail housings

Accessories

DIN rail adapter

- > DIN rail adapter for mounting 6 x distributor modules, 1 RU in different distribution systems with a DIN rail (TH35)
- > suitable 6 x modules: C6_A modul 6 port, E-DAT C6_A 6 port, E-DAT modul 6 port, E-DAT C6 6 port, OpDAT 6M

P/N	COLOR	EQUIPPING	DESIGN
1308990110-E	light gray	unequipped	for 6x distributor modules

DIN rail adapter mini

- > for mounting heavy devices on a DIN rail (TH 35)
- > fastening screws are not included in the delivery contents

P/N	COLOR	DESIGN	SCOPE OF DELIVERY
1308990111-I	metallic	DIN rail adapter	without attachment screws

DIN rail adapter mini FS

- > for mounting lightweight devices such as wall outlets on a DIN rail (TH 35)
- > delivery contents: adapter and screws (M4 x 6)
- > two DIN rail adapters mini FS are required for mounting a wall outlet

P/N	COLOR	DESIGN	SCOPE OF DELIVERY
1308990112-I	metallic	DIN rail adapter	with attachment screw

Cable gland M20 incl. strain relief

- > additional strain relief for OpDAT REGplus or OpDAT REGpro splice distributors
- > M20 screw fitting
- > with strain relief for Kevlar®
- > one additional strain relief per splice distributor possible

P/N	CLAMPING RANGE	COLOR
150240M20Z-E	7-12 mm	gray

DIN rail housings

Accessories

OpDAT REGpro
splice tray with
crimp splice holder

- > splice storage for OpDAT REGpro and OpDAT REGpro24
- > with splice holder for up to 12 crimp or shrink splice protection pieces

P/N	COLOR	SPLICE HOLDER
15024ASK-E	light gray	incl. crimp splice holder
15024ASK-S	light gray	incl. shrink splice holder

Notes

Patch panels

1	Copper modular (connection technology module)	116
2	Copper compact (LSA connection technology)	118
3	DCCS – Data center solution	120
4	Fiber optic patch panels 19 inch	126
5	Modular 3 RU / 7 HP system	133
6	Empty housings and module frames	136
7	Coax	140
8	Cable management Special panels	140
9	Accessories	142

For distributing structured cabling, METZ CONNECT offers patch panels, module and subracks with matching accessories for copper and fiber optic connections in module or compact designs and in different power classes, height units and with different numbers of ports.

Patch panels

Copper modular (connection technology module)

C6_Amodul 24 port 180°M 1 RU

- > 19 inch 1 RU module frame with 24 individual modules C6_Amodul 180°
- > GHMT Cat.6_A re-embedded PVP certified
- > Cat.6_A component testing according to ISO/IEC 11801, DIN EN 50173-1 and IEC 60603-7-51, GHMT certified
- > for 10BaseT, 100BaseT, ATM 155 MBit/s, Gigabit Ethernet, 10 Gigabit Ethernet, suitable for Remote Powering (PoE, PoE plus, UPoE and 4PPoE), HDBaseT, SAT-IP and AV over IP
- > connection of data lines AWG 26/1 to 22/1 (single wire) and AWG 26/7 to 22/7 (multi-wire) to IDC type terminal blocks
- > migration to 25G systems without special tools
- > strain relief via snap-on clip directly on the charger of the C6_Amodul
- > additional strain relief on the patch panel possible with cable ties
- > M6 x 10 grounding bolts with nuts and lock washers
- > integrated dust protection covers (colored dust protection covers on page 143)

DCCS Link LC-Duplex

- > DCCS-Link, consisting of a pre-assembled cable with DCCS housings mounted on both sides
- > housing equipped on the front with six LC-Duplex adapters each
- > easy mounting/removal in DCCS subrack (19 inch, 1 RU) and easy patching on the front side using duplex patch cords
- > mini breakout cable with 12 fixed wires, cable diameter: 6.9 mm
- > assignment/polarity: crossed (standard) or uncrossed
- > delivery with serial number and measurement protocol
- > housing: galvanized steel sheet, front stainless steel, strain relief via cable gland
- > customer-specific cable lengths between 1 and 999 m
- > variants: blue (SM), green (SM APC), lime green (OM5), heather violet (OM4), aqua (OM3)
- > all available variants can be created using the DCCS fiber optic configurator

Fiber optic wall distributors

OpDAT WV

For multi-family buildings

- > fiber optic distributor for use as a building distribution point in the utility room of multi-family buildings
- > surface mount housing with two lockable hinged doors, two different locks for the separation between the network wiring and other building cabling
- > available for 6, 12, 18, 24 and 30 residential units. Each residential unit can be placed in a separate splice tray
- > each splice tray is ready to splice with 4 pigtails
- > the front plate is equipped with up to 30 LC-Q APC adapters. each adapter can be assigned to one residential unit and one splice tray
- > innovative stackable for up to 30 cables with max. diam. 4.5 mm
- > brush strip as cable outlet for building cabling
- > foam for dust-free insertion of the patch cord from the network side
- > dimensions: 405 x 400 x 107 mm

Fiber optic wall distributors and housings

Fiber optic building transition point

OpDAT HP Splice

- > fiber optic splice/distributor housing for use as a building transfer point
- > equipped with adapters and pigtails
- > cover lock by means of locking hooks with the possibility for sealing
- > cover can be very easily removed to facilitate mounting
- > splice tray for easy mounting and maintenance with maximum protection of fibers with a outcrossing possibility and storage of excess fiber lengths
- > available with or without lock
- > strain relief for cables and patch cords
- > mounting option and attachment for gas/water blocker available
- > patch cords outlet with flexible lamella seal
- > two cable infeeds for M20/25, one M20 cable gland enclosed
- > attachment option for optical coupler
- > structured ASA (acrylic ester styrene acrylic nitrile) in RAL 7035, extremely resistant plastic, shock and weather resistant

Notes

Consolidation Point (CP) | Service Concentration Point (SCP) | Service Outlet (SO)

- 1 Wall-mounted distributor patch panel
surface mount housing (CP | SCP) 160
- 2 Modul surface mount housing
(CP | SCP | SO) 160
- 3 Module for 6 port module frame 161
- 4 Consolidation Point..... 161

Whether as a classic consolidation point in tertiary cabling or as a service concentration point for distributed building services for decentralized floor distributors. Wall-mounted, ceiling or floor-mounted housings to install modular connections (copper and fiber optic) are versatile, and can be used for decentralized distribution of network cabling to individual workstation islands or to entire zones. The service outlets look like terminal outlets or device connections, and serve, for example, as unconventional wall outlets for devices in distributed building services.

IP protected housings

MCO IP69k – protective housings for DNT outdoor applications

MCO IP69k – protective housing for DNT*-outdoor applications

Digital networking | The demand for cabling solutions for outdoor areas is increasing steadily. This is due to modern network and IP interface technologies, which are essential for digitization. These are

used to network and provide monitoring cameras, sensors and digital traffic signs, as well as wireless access points.

METZ CONNECT Outdoor | Our MCO IP69k protective enclosures provide reliable protection for your permanent outdoor connections. They are not only completely dustproof and waterproof, but also resistant to ozone, UV radiation and salt water. Furthermore, they withstand high temperatures,

strong vibrations and high-pressure jet cleaning, thus providing reliable protection against external interference. The flexible and easy-to-install solutions have been specially designed to accommodate and protect field-assembled cables, pre-assembled patch cables and fiber optic connections.

Flexible & reliable | Our universally applicable protective housings for outdoor applications are available in three different versions, and cover all conceivable applications in practice. The three variants of the protective housings have been specially designed for free installation, as well as for wall, DIN rail, quick and pole mounting. In addition, we also offer a solution for wall or housing feed-through.

Thanks to the adapter plates included in the delivery contents, countless combination options are possible, with various modules, plug-in plugs and cable connectors. Regardless of whether it is a matter of accommodating and protecting field-assembled cables or pre-assembled patch cables and fiber optic connections.

*DNT = data network technology

IP protected housings

MCO IP69k – protective housings for DNT outdoor applications

MCO IP69k – Set for free installation

- > for universal and flexible use
- > completely dust and waterproof
- > resistant to ozone, UV radiation and salt water
- > resistant to high-pressure jet cleaning, high temperatures and strong vibrations
- > tested according to IP69k, IP67 and IP66
- > M32 anodized aluminum tubes and flange
- > incl. M32 cable gland (PA) with sealing inserts, O-rings and adapter plates for MC Modul, Keystone and fiber optic components, for clean mounting inside the flange
- > suitable for cable sheath diameters from 4.5 to 15 mm

P/N

14040000-E

MCO IP69k – Set with mounting bracket

- > designed for wall, top-hat rail, quick and pole mounting
- > incl. mounting bracket and mounting plate for quickly attaching the flange without tools
- > for universal and flexible use
- > completely dust and waterproof
- > resistant to ozone, UV radiation and salt water
- > resistant to high-pressure jet cleaning, high temperatures and strong vibrations
- > tested according to IP69k, IP67 and IP66
- > M32 anodized aluminum tubes and flange
- > incl. M32 cable gland (PA) with sealing inserts, O-rings and adapter plates for MC Modul, Keystone and fiber optic components, for clean mounting inside the flange
- > suitable for cable sheath diameters from 4.5 to 15 mm

P/N

14040010-E

MCO IP69k – Set wall and housing bushing

- > incl. M40 lock nut (PA) for wall and housing mounting
- > for universal and flexible use
- > completely dust and waterproof
- > resistant to ozone, UV radiation and salt water
- > resistant to high-pressure jet cleaning, high temperatures and strong vibrations
- > tested according to IP69k, IP67 and IP66
- > M32 anodized aluminum tubes and flange
- > incl. M32 cable gland (PA) with sealing inserts, O-rings and adapter plates for MC Modul, Keystone and fiber optic components, for clean mounting inside the flange
- > suitable for cable sheath diameters from 4.5 to 15 mm

P/N

14040100-E

MCO IP69k – protective cover for flange

- > M32 anodized aluminum protective cover
- > suitable for P/N: 14040000-E, 14040010-E, 14040100-E

P/N

14040202-E

IP protected housings

IP protected housings V1

E-DAT Industry IP67 V1 AP + RJ45 field jack

- > RJ45 termination unit in flange housing with bayonet lock according to standard ISO/IEC 24702 and IEC 61076-3-106 Var. 1
- > Class E_A compliant according to ISO/IEC 11801, DIN EN 50173-1
- > suitable for 10 GBit Ethernet (IEEE 802.3an), Remote Powering (PoE, PoE plus, UPoE)
- > 1 port IP67 protected housing with flange cover
- > AWG 26/7 to 22/7, AWG 26/1 to 22/1 possible
- > increased vibration and shock resistance thanks to 4 springs on the shielding plates
- > no specialized tools required
- > stackable surface mounting possible
- > commonly available RJ45 plugs can be installed (no IP protection)
- > simple, time-saving mounting

P/N	COLOR	DESIGN	EQUIPPING

ISDN-Adapter with extension WE 8 – 2 x WE 8

- > ISDN adapter for expanding an RJ45 slot into two RJ45 slots
- > input side: RJ45, WE8(8)
- > output side: 2 x RJ45, WE8(8)
- > terminating resistors: none
- > extension: 0.1 m

P/N	COLOR	ASSIGNMENT	LENGTH
130610480101-E	pearl white RAL 1013	W8 – 2 x W8	0.1 m

Accessories and installation aids

Adapters

ISDN-Adapter with extension WE 8 – 2 x WE 8 R

- > ISDN adapter with integrated terminating resistors for a plug-in ISDN 50 bus termination
- > using this adapter with an RJ45 jack means no slots are lost
- > input side: RJ45, WE8(8)
- > output side: 2 x RJ45, WE8(8)
- > terminating resistor: 2 x 100 Ohm

P/N	COLOR	ASSIGNMENT	LENGTH
130606480101-E	pearl white RAL 1013	W8 – 2 x W8-R	0.1 m

UAE-Adapter with extension WE 8 – WE 8(4)/WE 8(4)

- > UAE adapter for simultaneous operation of two 4-wire services, here 2 x telephone (ISDN) via an 8-wire installation cable
- > use in pairs: one adapter on the wall outlet, one adapter on the distributor
- > input side: RJ45, WE8(8)
- > output side: 2 x RJ45, WE8(4)

P/N	COLOR	ASSIGNMENT	LENGTH
130608480101-E	pearl white RAL 1013	W8 – W8(4)/W8(4)	0.1 m

UAE-Adapter with extension WE 8 – WE 8/WE 8

- > UAE adapters for adapting analogue terminal devices with different pin assignments to the universal building cabling
- > input side: RJ45, WE8(4)
- > output side: 2 x RJ45 – IEC standard

P/N	COLOR	ASSIGNMENT	LENGTH
130607440101-E	pearl white RAL 1013	W8(4)W8/W8	0.1 m

UAE-Adapter with 0.1 m extension WE 8 – NFN

- > UAE adapters for adapting analogue terminal devices with different pin assignments to the universal building cabling
- > input side: RJ45, IEC standard EabW
- > output side: TAE jack NFN

P/N	COLOR	ASSIGNMENT	LENGTH
130450440101-E	pearl white RAL 1013	WE8 NFN	0.1 m

Accessories and installation aids

Adapters

TAE-Adapter with extension F-TAE/WE 8/6

- > TAE adapter for plug-in expansion of a TAE 1 x 6 F wall outlet to a 1 x TAE U connection (F or N) + WE (RJ11/RJ45)
- > the adapters are inserted into a TAE 1 x 6 F wall outlet or an AMS, after which they can be used to connect a telephone and up to two additional devices (such as a fax machine, call answering machine, or fee counter)
- > the adapter has a WE8 connection socket with plug reduction. The plug reduction is used to reduce the inserted width of RJ45 (8 pole) to RJ11/12 (6 pole) the plug reduction can remain installed or be removed, depending on the application
- > input side: TAE plug F
- > output side: TAE jack U (F or N) and RJ45 (RJ11)

P/N	COLOR	ASSIGNMENT	LENGTH
130597-E	pearl white RAL 1013	F-WE8(6)	6.0 m

Accessories and installation aids

Installation testers copper cabling

KAPri plus cable and installation tester

- > detection and display of the most common installation errors: short circuit, core interruption wire reversal, cable reversal, split pair
- > display of external voltages for each buffer with their polarity
- > cable identification through detection of up to nine test box numbers
- > detection and display for incorrectly set connection assignments
- > error display for each individual buffer with the nine red LEDs
- > display with a green LED when no errors are found
- > clear display of the error type via a 7 segment display
- > low voltage indicator for the battery
- > automatic testing process
- > simple operation and interpretation of test results
- > on/off and start of the test process via a button
- > quick test, approx. 3 seconds
- > query the error list for multiple errors using a separate button
- > option to set the connection assignments with nine setting switches
- > connection via RJ45 plugs, allowing for patch cords to be tested

P/N	COLOR	SCOPE OF DELIVERY
130670-E	light gray	base device + test box 1

KAPri plus plastic case completely equipped

- > contains all KAPri plus components for testing installed RJ45 and M12 solutions in all areas of structured building cabling
- > protecting components from dust and dirt
- > clear arrangement
- > KAPri plus cable and installation tester
- > detection and display of the most common installation errors, such as split pair, loose contact, core interruption, short circuit, wire and cable reversal, external voltage
- > stable plastic case made of polypropylene with optimal function
- > hard foam insert in the bottom section with cut-outs for all KAPri plus components
- > intermediate plate (anthracite) in the top section
- > napped foam insert in the top section

P/N	COLOR
130676-01-E	black

Accessories and installation aids

Installation testers copper cabling

KAPri plus expansion set M12 X-coded

- > KAPri plus expansion set M12 X-coded
- > supplements the KAPri plus basic device for detecting installation errors for data connection lines with X-coded M12 connectors

P/N	COLOR	EXTENSION
130674-E	black/green	M12 X-coded

KAPri plus expansion set M12 D-coded

- > KAPri plus expansion set M12 D-coded
- > supplements the KAPri plus basic device for detecting installation errors for data connection lines with D-coded M12 connectors

P/N	COLOR	EXTENSION
130675-E	black/green	M12 D-coded

KAPri plus Testbox

- > replacement part test box no. 1 (included in the KAPri plus basic device)
- > test box set 1 with test boxes no. 2, 3, 4, 5
- > test box set 2 with test boxes no. 6, 7, 8, 9
- > saves time traveling to the individual connections
- > variants: test box 1, test box set 1, test box set 2

P/N	COLOR	SET	TEST BOXES
130671-E	light gray	1	2, 3, 4, 5
130672-E	light gray	2	6, 7, 8, 9
130673-01-E	light gray	0	1

KAPri plus plastic case unequipped

- > KAPri plus plastic case unequipped
- > stable plastic case made of polypropylene with optimal function
- > hard foam insert in the bottom section with cut-outs for all KAPri plus components
- > intermediate plate (anthracite) in the top section
- > napped foam insert in the top section
- > protecting components from dust and dirt
- > clear arrangement
- > stable closures

P/N	COLOR	EQUIPPING
130676-E	black	unequipped

Accessories and installation aids

Tools

Jokari stripping tool

- > for quickly and precisely stripping data cables
- > with adjustable stop

P/N	COLOR
140302-01-E	white

Parallel pliers 1 3/8 inch

- > adjustable parallel pliers for pressing C6_A modul, E-DAT modul, E-DAT Industry field jack and E-DAT Industry field plug
- > very easy handling

P/N	COLOR
140301-E	metallic/red

Assembly pliers for E-DAT Industry IP20 RJ45 plug

- > for assembling the E-DAT Industry IP20 RJ45 plugs, plug inserts and IP67 V6 plug
- > crimp contacts and shielding can be connected in a single work step with a crimp tool
- > delivered in a plastic case

P/N
130907-E

Insertion tool LSA-PLUS®

- > the insertion tool S (S for sensor) presses a cable core into the LSA-PLUS® IDC type terminal blocks in a defined position and cuts the buffer to length in the same work step

P/N	COLOR
130818-E	light gray

Accessories and installation aids

Tools

Fiber optic tool bag

- > practical bag with hip belt and multiple internal compartments
- > scissors for cutting aramid yarn (Kevlar®)
- > pallet pliers for 3 different diameters:
 - for removing the cable sheath (1.63 mm -> 0.9 mm)
 - for removing the secondary coating (0.9 mm -> 0.25 mm)
 - for removing the primary coating (0.25 mm -> 0.125 mm)
- > cleaning tissues and cleaning liquid for easily and quickly cleaning glass fibers after removing
- > tweezers for safely removing glass fiber pieces
- > container for safely disposing of fiber pieces
- > red light source for fiber optic connectors with 1.25 and 2.5 mm ferrule for error detection and continuity testing
- > ferrule cleaner for fiber optic connectors with 1.25 and 2.5 mm ferrules for more than 800 cleaning processes
- > 2 screwdrivers (Philips head and flat head)
- > all parts of the bag are also available individually
- > the bag also offers space for additional tools

P/N	COLOR
150800200-E	blue

Fiber optic cleaning box

- > fiber optic cleaning box for dry cleaning and inspection of fiber optic connectors
- > easy to use and complete work quickly on site
- > microscopic camera and LCD monitor for quickly and easily checking or evaluating the connector end surfaces on the connector and in the adapter
- > camera adapter for different fiber optic connectors and fiber optic adapters
- > ferrule cleaner for connectors with 1.25 and 2.5 mm ferrules (inserted and not inserted)
- > cleaning tray for more than 500 cleaning cycles, with additional replacement tray
- > all components of the case are also available individually (except for the microscopic camera and monitor)

P/N	COLOR
150800100-E	blue/yellow

CLETOP-MPO cleaning tray MTP®

- > cleaning tray suitable for MPO and MTP®, female or male connector with angled or straight polishing
- > safely and easily remove dust, dirt and grease
- > a new piece of cleaning band is used for each application
- > up to 500 cleaning cycles possible then the reel can be exchanged

P/N	COLOR
150800113-E	green

CLETOP-SB-cleaning tray

- > the CLETOP-SB cleaning tray is suitable for all commonly available fiber optic connectors with straight or angled polishing incl. MPO-F and MTP®-F connectors
- > safely and easily remove dust, dirt and grease
- > a new piece of cleaning band is used for each application
- > up to 400 cleaning cycles possible, then the inner tray can be replaced

P/N	COLOR
150800115-E	green

Accessories and installation aids

Tools

Fiber optic cleaning tray

- > cleaning tray for all connector types
- > applications for SC, FC, ST, LC, E2000
- > dimensions: (W x H x D) 115 mm x 79 mm x 32 mm
- > number of cleanings: 500+ per box

CLETOP-SB replacement tray ws

- > tray for exchanging in the CLETOP-SB-cleaning tray

P/N	COLOR
150800103-E	white

P/N	COLOR
150800116-E	blue

CLETOP-MPO replacement roll MTP®

- > tray for exchanging in the CLETOP-SB-cleaning tray

Replacement cassette

- > fiber optic cleaning replacement tray
- > applications for SC, FC, ST, LC, E2000
- > dimensions: 115 mm x 79 mm x 32 mm
- > number of cleanings: 500+ per box

P/N	COLOR
150800114-E	white

P/N	COLOR
150800104-E	white

Accessories and installation aids

Tools

One-Click™ Cleaner

- > suitable for 1.25 mm, 2.5 ferrules or MTP®-connectors
- > the ferrule cleaner can clean ferrule end surfaces either directly or through couplings
- > safely and easily remove dust, dirt and grease
- > up to 500 cleaning cycles possible (a fresh piece of cleaning band is used during each application)

P/N	COLOR	APPLICATION
150800111-E	white	1.25 mm ferrule
150800112-E	white	2.5 mm ferrule
150800120-E	white	MPO connector

Cleaning fluid

- > non-hazardous / not regulated for all types of transportation, including air travel
- > unique dispenser for using with connector cleaning tips and fiber cloths
- > up to 400+ cleaning cycles per outlet
- > dries without residues, in contrast to alcohol
- > dissipates static charge
- > suitable for all surfaces, including soft plastics
- > cleans all types of connector end surfaces
- > cleans the unmachined fibers before field termination with the fusion splices
- > removes oil, salt, dust, dirt and unhardened epoxies
- > safe on glass, ceramic, metal and plastic optical fibers
- > compact size – easily fits into tool sets, instrument cases, connection sets and inspection kits
- > perfectly cleans all optical components

P/N
150800204-E

Cleaning cloths

- > paper
- > 280 pieces per box

P/N	COLOR
150800203-E	white

Red light

- > optical fault finder
- > for testing single mode and multi-mode glass fibers and other fiber optic components for breakages or faults and for finding the right pairings in a bundle of glass fibers
- > red light source for fiber optic is equipped with two adapters that can be used to contact almost all fiber optic connectors (1 x universal adapter for 2.5 mm ferrules (DIN, E2000, FC, SC, ST, etc.) and 1 x adapter for 1.25 mm ferrules for SFF connectors (LC))
- > used wavelength of approx. 650 nm is easily visible
- > with optical output power of approx. 1 mW corresponding to red light source of laser Class 2 (IEC 825-2) and can be freely operated without protective measures
- > outstanding for everyday use thanks to small, compact and easy to handle design
- > can be used in different cabling tasks, both outdoors, in harsh industrial environments and in the laboratory

P/N	COLOR
150800205-E	black

Accessories and installation aids

Tools

Tweezers

- > end: straight and pointed
- > steel: hardened, rust-resistant
- > length: 126 mm

P/N	COLOR
150800206-E	metallic

Joggling tool

- > the 3 x pallet pliers can be used for all common fiber stripping functions
- > the first hole in the pallet pliers removes the 1.6 - 3 mm fiber sheath to below the 600 - 900 micron buffer coating
- > the second hole removes the 600 - 900 micron buffer coating to below the 250 micron coating
- > the third hole is used to remove the 250 micron cable to below the 125 micron optical fiber without notches or scratches
- > handle made of TPR (thermoplastic rubber)

P/N	COLOR
150800202-E	black/yellow

Kevlar® shears

- > scissors for cutting aramid yarn (Kevlar®)

P/N	COLOR
150800201-E	metallic

Container

- > container for fiber scraps with specialized lid
- > capacity 100 ml / 500 ml
- > material: polypropylene
- > cover cannot be removed after pressing in

P/N	COLOR	CAPACITY
150800207-E	yellow	100 ml
150800208-E	red	500 ml

Accessories and installation aids

Tools

FAST Guide

- > fiber insertion aid for fiber optic connectors for field assembly LC (OpDAT FAST™ Hybrid and OpDAT FAST™)
- > used for exactly marking the trimming dimensions on the buffer and for safely and easily inserting the fibers into the connector
- > color: blue

P/N	COLOR	CONNECTOR TYPE
15080020FGE-E	blue	SC
15080020FGJ-E	blue	LC

OpDAT fiber terminal

- > fiber / buffer terminal for inserting into the cleaver of the OpDAT FAST™ Hybrid and OpDAT FAST™
- > used to hold the buffer to prevent the fiber from pulling back and to facilitate an exact trimming dimension for the fibers

P/N	COLOR
150800209-E	black

FAST assembly set

- > cable assembly set for fiber optic connectors for field assembly LC (OpDAT FAST™ Hybrid and OpDAT FAST™)
- > incl. cable clamps for cable diameters 2 and 3 mm
- > used to safely insert the fibers into the connector and for easily handling the Kevlar® fibers

P/N	COLOR	CONNECTOR TYPE
15080020KEO-E	green	SC
15080020KJO-E	blue	LC

Notes

Configurators

The METZ CONNECT configurators are convenient online tools with an appealing design: simple, intuitive operation – they run directly in your browser and without the need to install additional software. Different cable types and patch panels can be configured. From pre-assembled glass fiber and copper installation cables to patch cords to IP protected assemblies, the tools can be used to configure a wide range of products.
