Product specification

Leakage sensors are connected to level monitors such as the ENW-E12 (P/N 110308xx) and MR-LD6 (P/N 11084413) in order to detect conductive liquids in the event of a pipe break, for example. If an electrically conductive liquid (e.g. water) gets between the two electrodes, an electrical connection is created which triggers the alarm on the connected level monitor ENW-E12 or MR-LD6. The LKS-ZD leakage sensor also includes the feature for wire breakage monitoring on the MR-LD6 leakage monitoring device. Color: gray.
